

Patrick Rubio

Software Engineer | Backend • Cloud • Full-Stack

Los Angeles, CA • 818-967-9309 • patrickr002@gmail.com • [GitHub](#) • [LinkedIn](#) • [Portfolio](#)

SUMMARY

Software Engineer with experience developing backend, mobile, full-stack, and cloud applications using Java, Spring Boot, SQL, TypeScript, React Native, and AWS. Skilled in REST API development, relational database design, authentication, serverless architecture, and application deployment. Former Starbucks Store Manager with experience leading teams of 30+ employees, coordinating complex operations, and solving problems across technical and business environments.

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL, HTML, CSS

Frameworks/Libraries: Spring Boot, Spring Data JPA, Hibernate, React Native, Expo, Android, Room

Databases: PostgreSQL, MySQL, SQLite (Room), DynamoDB, Redis

Cloud: AWS (Amplify, Lambda, API Gateway, Elastic Beanstalk, S3, DynamoDB)

Tools: Git, GitHub, GitLab, Visual Studio Code, IntelliJ, Maven, Postman, Docker

Concepts: REST APIs, MVC, Object-Oriented Programming, Agile Methodology, CRUD, Authentication, CI/CD

TECHNICAL PROJECTS

ReserveNow — Booking System & Reservation Backend | *Java, Spring Boot, PostgreSQL*

- Developed a Spring Boot REST API for managing listings, availability, and managing time-based services.
- Designed layered controller-service-repository architecture using Spring Boot, Spring Data JPA, and PostgreSQL.
- Implemented user registration, BCrypt password hashing, login validation, and PostgreSQL persistence.
- Modeled relational data for users, service providers, listings, bookings, and transactional reservation logic.

BudgetPair — Couples Budgeting Application | *React Native, Expo, TypeScript*

- Developed a mobile application for managing budgets, transactions, financial goals, and shared finances.
- Built couple synchronization using Hono, tRPC, Vercel, and Upstash Redis while keeping financial data stored locally.
- Implemented RevenueCat purchase handling and entitlement validation for the app's lifetime Pro upgrade.

Wedding RSVP Platform | *HTML, CSS, JavaScript, AWS Amplify, DynamoDB, AWS Lambda*

- Built and deployed a cloud-hosted responsive RSVP platform used by 100+ wedding guests.
- Implemented secure form submission and guest logic with AWS Amplify, Lambda, and DynamoDB.
- Configured AWS Amplify hosting, Route 53 domain setup, and Lambda/API Gateway CORS headers for cross-browser RSVP form submissions.

Vacation Planner Mobile App | *Java, Android, SQLite*

- Developed a native Android application using Java, Room, MVVM architecture, and XML layouts.
- Implemented CRUD operations, persistent local storage, RecyclerView navigation, and added search date validation.
- Tested core app functionality across Android emulators, physical devices, and unit tests.

EXPERIENCE

Starbucks Coffee Company — Los Angeles, CA

Store Manager (2022–2025)

- Led, coached, and developed a team of 30+ employees while managing hiring, onboarding, scheduling, inventory, performance, and daily operations.
- Managed hiring, onboarding, scheduling, inventory, and daily operations while using forecasting tools to improve staffing, labor efficiency, and workflow planning.
- Coordinated a full store remodel between contractors, internal teams, and staff while minimizing business disruption.

Shift Supervisor — Part-Time (2025–Present)

- Transitioned to part-time to complete B.S. in Software Engineering and develop independent software projects.

EDUCATION & CERTIFICATIONS

B.S. Software Engineering, Western Governors University (2025)

B.S. Business Administration (Cum Laude), California State University Northridge (2021)

Certifications:

- AWS Cloud Practitioner | CompTIA Project+ | ITIL Foundation | WGU Java Backend & Frontend Certs
